Chairman's Statement

DEAR SHAREHOLDERS,

It is with immense pride and a sense of responsibility that I address you in this 55th Annual Report of Bharat Dynamics Limited (BDL) for the fiscal year 2024-25. As a cornerstone of India's defence manufacturing ecosystem, BDL continues to uphold its commitment to strengthening the nation's security while contributing to the vision of Aatmanirbhar Bharat (Self-Reliant India). This year has been a landmark one for BDL, marked by robust growth, strategic advancements, and a reaffirmed dedication to innovation and excellence.

A Year of Remarkable Achievements.

The fiscal year 2024-25 has been a testament to BDL's resilience and adaptability in a dynamic global environment. We achieved a remarkable turnover of ₹3,345 crore, reflecting a stellar 41% growth compared to ₹2,369 crore in FY 2023-24. This significant increase underscores our ability to execute high-value projects efficiently and meet the evolving needs of the Indian Armed Forces. Our export turnover soared to over ₹1,270 crore, a phenomenal 689% rise from ₹161 crore in the previous year, reinforcing BDL's growing presence in the global defence market.

Our order book as of 31 March, 2025, stands at an impressive ₹22,814 crore, bolstered by new orders worth about ₹6,668 crore secured during the year. These figures reflect the trust placed in BDL by our stakeholders and our capability to deliver cutting-edge missile systems and allied defence equipment. Key products, including Anti-Tank Guided Missiles (ATGMs), Surface-to-Air Missiles (SAMs), Underwater Weapon Systems etc. continue to form the backbone of our portfolio, ensuring operational readiness for our Armed Forces.

BDL has recorded a Profit Before Tax (PBT) of ₹748.76 crore and a Net Profit of ₹549.64 crore as against PBT of ₹828.24 crore and Net Profit of ₹612.72 crore of previous financial year. A marginal reduction from previous years net profit in view of the product mix.

I am extremely pleased to inform you that BDL continues to maintain a consistent dividend payment. Your Board has recommended a final dividend of ₹0.65 per equity share of ₹5 each, amounting to ₹23.83 crore. It also gives me great pleasure to inform you that BDL has already paid an interim dividend of ₹4 per equity share of ₹5 each in February 2025. The total dividend for FY 2024-25 declared by the company is ₹4.65 per share (at face value of ₹5 each).

BDL's Role in Recent Operation.

BDL continues to support our Armed Forces and it is understood that the various Air Defence missiles produced by BDL played a significant role in the recent Operation. This operation showcased the systems' reliability, precision, and capability in countering aerial threats under operational conditions, reinforcing India's indigenous defence technology advancements. On behalf of the Board, I take the opportunity to congratulate all BDL team for being a part of this successful operation.

Performance Vis-A-Vis MOU.

In terms of the Memorandum of Understanding (MoU) signed with the Department of Defence Production, Ministry of Defence (MoD), Government of India, BDL has been rated **"Very Good" for the year 2023-24**, and for 2024-25, it is under evaluation.

Driving Indigenization and Innovation.

BDL remains at the forefront of the Government of India's Aatmanirbhar Bharat Abhiyan, with a steadfast focus on indigenization. Our five-year indigenization plan (2020-21 to 2024-25) has yielded significant results, with 49 out of 59 identified items successfully indigenized as part of the Ministry of Defence's Positive Indigenization Lists. These efforts not only reduce dependency on imports but also foster a robust domestic defence manufacturing ecosystem.

Technology upgradation has always been an area of priority for BDL in order to keep pace with the current requirements in the global defence industry. In pursuit of this, during the year BDL has signed 25 MoUs / teaming agreements with several entities, out of which 5 are foreign entities and 20 are domestic entities (which includes 8 MSMEs).

Corporate Social Responsibility and Sustainability Development.

BDL is conscious of its responsibilities towards society, and as per the provisions of the Companies Act, 2013, BDL is spending 2% of the average net profits of the immediate three preceding financial years towards CSR activities. The core areas of focus under CSR are healthcare, nutrition, education and literacy, skill development and sanitation, Sahara hostel for Veer Naaris, etc. BDL, as per DPE Guidelines, has also ventured into aspirational districts and underdeveloped areas in Telangana and Andhra Pradesh to undertake corporate social responsibility (CSR). During the year, the Company has spent ₹13.34 crore as against the statutory requirement of ₹12.88 crore. The surplus amount spent of ₹45.90 lakh is available for set-off in succeeding financial years.

Some of the major projects taken up during the year are as follows:-

- i) Sahara Hostel for Veer Naaris, Vishakhapatnam
- ii) Healthy Baby Nutrition Support (3000 kits) by ABV Foundation, Secunderabad
- iii) Smart Classrooms in Vizianagaram District and Visakhapatnam, District of AP
- iv) STERRAD 100S GAS PLASMA STERILIZER to MNJ & Regional Cancer Centre, Hyderabad
- v) Construction of Choultry (III floor) + Lift at MNJ & Regional Cancer Centre, Hyderabad
- vi) Critical Care Ambulance to Military Hospital, Secunderabad
- vii) Medical Infrastructure at Healthcare Centre at Kumuram Bheem Asifabad of TS, Parvathipuram & Gajapathinagaram of AP
- viii) Fitment of Cochlear Implants to the Children with Hearing Impairment through ALIMCO of Telangana and Andhra Pradesh State

During the year, BDL has been awarded the following awards for its CSR activities:-

- i) Global CSR Excellence & Leadership Awards in recognition of "Quality of Education" and "Concern for Health".
- ii) Grow Care India CSR Excellence Leadership Award Concern for Health.

Corporate Governance.

BDL has a well-established relationship between Company's Management, its board, its shareholders, and other stakeholders. With its well-laid-out principles, policies, procedures, and clearly defined responsibilities and accountabilities, BDL has the perfect means of attaining its objectives and systems in place for monitoring the performance.

BDL conducts business with the highest ethical standards and prohibits all forms of bribery and corruption across all units of the organisation. During the year under review, no such instances of bribery or corruption were reported.

BDL's activities are monitored by several external agencies like the Statutory Auditors, Comptroller and Auditor General of India, Internal Financial Controls, CVC, MoD (Dept. of Defence Production), etc.

Looking Ahead

As we move forward, BDL is poised for significant growth, driven by a robust order book and expanding export opportunities. The global demand for advanced defence systems presents a unique opportunity for BDL to showcase India's capabilities on the world stage. We are committed to enhancing our research and development efforts, fostering innovation, and strengthening our partnerships to deliver next-generation solutions.

The positive Indigenization List brought out by the GoI in terms of restriction of imports in different phases has opened up an opportunity to get continuous orders for these products for BDL from the Indian Armed Forces in the ensuing years, which will help to improve the BDL order book as well as help further growth of the company.

BDL is confident in the realisation of the potential orders due to the policy initiatives of the government and the ease of doing business in the country.

BDL is also investing in R&D activities in-house, with start Ups and MSMES and in association with DRDO for various development and production programmes. BDL is also entering into various agreements with foreign OEMs, both for manufacturing in India as well as joint development programmes for the globe.

With the success of the recent Operation of our Armed Forces, there is lot of interest in BDL's products like Akash Weapon Systems from potential buyers in the international defence market. BDL is in the process of converting the leads received into orders. In order to further consolidate the order book of the company, there is a huge emphasis laid by BDL on the necessity of realising export orders, and the company is pursuing the same aggressively.

The government is putting a lot of restrictions on imports and giving impetus to reduce foreign exchange; hence, the importance of enhancing indigenization for self-reliance is noted. In R&D, we have increased the expenditure and extended all the support. Emphasis is being laid on timelines for R&D Projects.

The Government of India's focus on defence modernization and self-reliance provides a strong tailwind for BDL's growth. We are confident that our strategic initiatives, coupled with our operational excellence, will enable us to achieve new milestones in the coming years.

Acknowledgement.

I wish to place on record, on behalf of the entire BDL family, our sincere thanks and gratitude to investors and shareholders who have reposed trust in this company and continued to support us in all our endeavours through this financial year. I also look forward to the same support from investors in the years to come.

My special thanks also go to the MoD, Government of India, DIPAM, State Governments, Customers, Inspection Agencies, DPSUs, our vendors, Employees of BDL and all the agencies involved directly or indirectly in the growth of this company.

I also thank the board members for their valuable guidance and encouraging support in the functioning of the company.

Finally, let me assure you that BDL is poised to reach greater heights. The entire fraternity of BDL will strive to achieve the desired results and exceed the investors' expectations.

I am proud of what we've accomplished together in the past few years, and I am even more optimistic about the opportunities ahead.

Jai Hind!!!

- 2.3 During the year under review, your company has achieved revenue from operations of ₹ 3345 crore, compared to ₹2369 crore in the previous financial year, registering a growth of 41%. The growth in turnover is primarily driven by boosted manufacturing activities and easing out of supply chain constraints.

During FY 2024-25, the company reported a profit before tax of ₹749 crore, compared to ₹828 crore in FY 2023-24. The decline is primarily attributed to the absence of a one-time net gain of ₹119 crore (after offsetting ₹46 crore in associated expenses) that was recorded in the previous financial year. Additionally, the current year's results were impacted by a ₹141 crore provision for a contract identified as onerous and a ₹90 crore provision for expected credit losses on trade receivables.

The major products executed during the year are ATGMs, Akash-SAMs. The order book position of the company as on 31 March 2025 is about ₹ 22814 crore.

2.4 Future Outlook:

In the fiscal year 2024-25, your company recorded a turnover surpassing ₹3345 crore, a 41% rise from the previous year, with exports soaring 689% to ₹1270 crore. The company secured orders worth ₹6668 crore building an order book of ₹22814 crore as on 31 March 2025. Your company anticipates further new orders worth ₹20000 crore over the next 2-3 years as several orders are in the finalization stages, ensuring robust future growth.

Your company is committed to advancing India's self-reliance in next-generation weapon systems by adopting a comprehensive and strategic approach. We prioritize the indigenous development of critical defence technologies, including missile seekers, homing systems, avionics, cruise missile propulsion, specialized warheads, and electronic warfare systems.

To drive innovation and foster cutting-edge research, we actively collaborate with premier Indian institutions such as IITs, NITs, and domain-specific research centers. These partnerships enable the co-creation of disruptive technologies tailored to India's strategic needs.

In parallel, we pursue joint ventures with leading global defence firms, bringing world-class expertise and manufacturing practices to India. These collaborations support both domestic requirements and export-oriented production, strengthening India's position in the global defence market.

We strategically engage in foreign technology transfer programs, not only to bridge existing capability gaps but also to fast-track the Make-in-India initiative. From the contractual stage, we emphasize maximizing indigenous content, ensuring that each project contributes to the long-term vision of technological sovereignty.

Through this integrated approach—combining indigenous innovation, global collaboration, and strategic capability-building—your company is shaping the future of India's defence ecosystem, making it robust, competitive, and self-reliant.

The Government of India has approved several BDL products for export, BDL has begun penetrating the global defence market, offering customized solutions and comprehensive lifecycle management for its products. By partnering with local defence industries in customer countries, BDL ensures robust, localized lifecycle support. To boost efficiency, BDL is optimizing its production lines by streamlining processes and adopting advanced technologies, ensuring timely deliveries while maintaining high-quality standards.

In FY 2025-26, we will continue to focus on organizational capacity building, talent development, and fostering a high-performance culture across the company. With a skilled workforce, solid institutional foundation, and a clear strategic direction, BDL is confident in its ability to deliver value to stakeholders, contribute meaningfully to national defence preparedness, and emerge as a global player in the defence manufacturing sector.

3. FIXED DEPOSITS FROM PUBLIC:

Your company did not accept any fixed deposits from public during the year, and there was no outstanding Fixed Deposits at the beginning/end of the year. Accordingly, there was no default in payment of deposits/interest thereon.

13. ATMANIRBHAR BHARAT & INDEGINISATION:

As part of its commitment to building an Atmanirbhar Bharat (Self-Reliant India), BDL has prioritized indigenization efforts from the very outset of each contract. The company manufactures missiles through Technology Transfer (ToT) agreements with both the Defence Research and Development Organisation (DRDO) and foreign Original Equipment Manufacturers (OEMs).

While initial ToT from foreign OEMs covered only around 60% of the technology, BDL has successfully increased indigenization levels to over 80%-90% in many of these products. For DRDO-designed systems, most of them have already achieved indigenization levels exceeding 90%. BDL continues to make concerted efforts to further enhance indigenization across its entire product range, reinforcing its role in strengthening India's defence manufacturing capabilities.

BDL is utilizing the Srijan Portal, an indigenization initiative by the Ministry of Defence. The primary objective of the Srijan Portal is to engage the private sector in the indigenization efforts of Defence PSUs. BDL regularly uploads details of imported items identified for indigenization, enabling Indian industry partners to come forward and participate in their development.

Accordingly, BDL has uploaded 1,198 imported items on the portal. As of this year, 217 items have been indigenized cumulatively. Necessary technical support is being provided to Micro, Small, and Medium Enterprises (MSMEs) to encourage them to produce quality components.

BDL is also fostering collaboration with startup companies, identifying problem statements for them to work on and develop innovative solutions. Memorandums of Understanding (MoUs) are being signed with these companies to support their growth and create new business opportunities.

Furthermore, as of this year, the Ministry of Defence has issued five Positive Indigenisation Lists (PILs) under the Department of Defence Production (DDP) as part of ongoing efforts to promote self-reliance in defence manufacturing through the Atmanirbhar Bharat Abhiyan. These lists include an embargo on imports beyond specified timelines.

Of the five PILs issued, 59 items are associated with BDL. Out of these, BDL has successfully indigenized 49 items, while the remaining items are at various stages of the indigenization process.

In line with the Government of India's vision for the Make in India initiative, with a special focus on Atmanirbharta in Defence, BDL has conducted and participated in several vendor development programs and seminars, showcasing components and sub-assemblies proposed for indigenization.

During these events, vendors were briefed on the indigenization procedures, as well as the technical and procedural support that BDL would provide throughout the indigenization process.

BDL and the Innovation for Defence Excellence (iDEX) programme have forged a strategic partnership, in alignment with the Government's vision of Atmanirbhar Bharat. This collaboration has led to the creation of a robust ecosystem where BDL works closely with aspiring entrepreneurs and MSMEs to enhance its innovation and R&D capabilities.

Through iDEX, BDL has been engaging with startups to develop innovative technologies for its R&D projects and for the production of missile systems for the Indian Armed Forces. As a result of this partnership, a Miniaturized Visual Imaging Guidance System was successfully developed during 2024-25.

1. BHARAT DYNAMICS LTD – AN OVERVIEW

Headquartered in Hyderabad, Bharat Dynamics Limited (BDL), was incorporated on 16 July, 1970 as a Public Sector Undertaking under Ministry of Defence, Government of India.

Over the years, BDL has evolved as one among few industries in world having state-of-the-art facilities for manufacture and supply of Guided Missiles, Underwater Weapons, Air-borne products and allied defence equipment for Indian Armed Forces. BDL also offers Product Life Cycle Support for all equipment supplied and also refurbishment / life extension of vintage Missiles already available in the inventory of the Indian Armed Forces. While fulfilling its basic role as guided weapon system manufacturer, BDL has also built-up in-house R&D capabilities primarily focused on Design & Engineering activities.

BDL is relentlessly working to contribute its part towards creation of a self-reliant India "Viksit Bharat" in the area of Defence. The Company is endeavouring to forge alliance with foreign companies to take the 'Make in India' mission further. Thrust is being given to engage with Original Equipment Manufacturers (OEMs) for new missiles and underwater weapons with potential Transfer of Technology. BDL has forayed into international market by offering its products to foreign countries.

1.1 Indian Defence Industry

India is one of the strongest military forces in the world and holds a place of strategic importance for the Government of India. India is the largest military spender and has positioned itself as a key player in the global defence industry. India ranked as the second-largest arms importer, though its imports declined by 9.3% between 2015-2019 and 2020-2024. The Indian defence manufacturing industry is a significant sector of the economy and may likely to accelerate due to current geo-political situations.

The Indian defence sector has witnessed significant developments and transformations during the financial year 2024-25, largely driven by strategic priorities, technological advancements, and geopolitical dynamics. During the fiscal year 2024-2025, India's defence sector experienced remarkable growth, underscoring the nation's commitment to self-reliance and global competitiveness in defence manufacturing.

India's domestic defence production reached ₹1,26,887 crore in FY 2023-24, marking a 16.7% increase from the previous year. This surge reflects the effectiveness of policies promoting indigenous manufacturing and the "Aatmanirbharta" (self-reliance) initiative. The public sector contributed 79.2% to this production, while the private sector accounted for 20.8%. The Government of India aims to escalate defence production to ₹3 lakh crore by 2029. 65% of defence equipment is now manufactured domestically, a significant shift from the earlier 65-70% import dependency, showcasing India's self-reliance in defence. A robust defence industrial base includes 16 DPSUs, over 430 licensed companies, and approximately 16,000 MSMEs, strengthening indigenous production capabilities.

The Ministry of Defence has signed a record 193 contracts in 2024-25, with the total contract value surpassing ₹2,09,050 crore, nearly double the previous highest figure. This milestone reflects the government's commitment to strengthening national security through enhanced procurement and modernisation of the Armed Forces. Of these, 177 contracts, accounting for 92 percent, have been awarded to the domestic industry, amounting to ₹1,68,922 crore, which is 81 percent of the total contract value. This significant focus on indigenous manufacturing aligns with the vision of self-reliance in defence production, boosting local industries and generating employment across the sector.

India's defence exports soared to a record ₹21,083 crore (approximately \$2.63 billion) in FY 2023-24, a 32.5% increase from the previous year. Over the past decade, exports have grown 30-fold, positioning India as a significant player in the global defence market. The private sector contributed about 60% of these exports, with Defence Public Sector Undertakings (DPSUs) accounting for the remaining 40%. The Government of India targets ₹50,000 crore in defence exports by 2029. The surge in the defence budget, from ₹2.53 lakh crore in 2013-14 to ₹6.81 lakh crore in 2025-26, underlines the nation's determination to strengthen its military infrastructure.

Overall, the 2024-2025 period marked a transformative phase for India's defence sector, characterized by substantial growth in production, exports, strategic collaborations, and technological innovations, aligning with the nation's vision of achieving self-reliance in defence. With an emphasis on indigenous production, technological advancements, and strengthening geopolitical alliances, India is positioning itself as a key player in global defence and underscore its transformation into a self-reliant and globally competitive military manufacturing hub.

The combination of strategic policy interventions, increased domestic participation, and a focus on indigenous innovation has significantly strengthened the country's defence capabilities. The increase in production, the exponential rise in exports, and the success of initiatives like the Make in India reflect India's commitment to achieving Atmanirbharta in defence.

As the fiscal year progresses, the focus will likely continue on enhancing defence capabilities, improving infrastructure, and ensuring that the country remains prepared to face evolving security challenges in the region and beyond. With ambitious targets set for 2029, the nation is poised to further expand its global footprint, reinforcing its position as a dependable partner in the international defence market while enhancing national security and economic growth.

1.2. Indigenization

The Ministry of Defence has taken numerous steps for self-reliance in the defence sector and Positive Indigenization Lists is one of the most important transformative reforms in pursuit of Indigenization. It is one of the key constituents of the Government's 'Atmanirbhar Bharat Abhiyan' to transform the defence sector to achieve self-reliance and boost exports with the active participation of the public and private sector. The Department of Defence Production (DDP) and the Department of Military Affairs (DMA) have issued five Positive Indigenisation Lists (PILs) for LRUs, assemblies, sub-assemblies, sub-systems, spares, components, and high-end materials. These lists set fixed timelines beyond which procurement will be restricted to domestic manufacturers. Out of over 5,500 items listed, more than 3,000 have been indigenised as of February 2025. Key indigenised technologies include artillery guns, assault rifles, corvettes, sonar systems, transport aircraft, light combat helicopters (LCHs), radars, wheeled armoured platforms, rockets, bombs, armoured command post vehicles, and armoured dozers.

Bharat Dynamics Limited (BDL) as part of its contribution to the creation of an Atmanirbhar Bharat (Self-Reliant India), has been focusing on indigenising technology from the moment a contract is signed. BDL manufactures missiles under Technology Transfer (ToT) agreements with DRDO and with Foreign Original Equipment Manufacturers (OEMs). The ToT for foreign OEM designed products was only 60%. However, BDL has achieved indigenisation levels of more than 80% to 90% in many of its products through its indigenisation initiatives. In the case of DRDO-designed products, most of them have achieved indigenisation levels of more than 90%. BDL is putting forth maximum efforts to achieve higher levels of indigenisation for all its products.

BDL is utilizing the Srijan Portal, a Ministry of Defence indigenisation portal. The main objective of Srijan portal is to partner the Private sector in Indigenisation efforts of Defence PSUs. BDL uploads the details of imported items which are planned for Indigenisation and the Indian Industry can come forward for developing these items.

BDL has uploaded 1198 Nos. of imported items on the portal. Till this year, 217 items (cumulatively) have been Indigenised. Necessary technical support is being provided to Micro, Small and Medium Enterprises (MSMEs) to encourage them to produce quality items. BDL is also fostering collaboration with startup companies, identifying problem definitions for them to work on and develop solutions. MoUs are being signed with these companies to support their growth and create business opportunities.

2. REVIEW OF BDL'S BUSINESS

The company operates in an environment characterised by both increasing complexity in factors influencing national security and continuing economic challenges in India and globally. A significant component of BDL's outlook in this environment is to focus on execution, improving standards and quality and predictability of the delivery of our products to the Indian Army. BDL also continues to invest in technologies to fulfil the requirements of the Indian armed forces and also invest in its people so that the company has necessary technical skills to succeed without limiting its ability.

2.2 Manufacturing facilities

The company has three manufacturing facilities located in Hyderabad, Bhanur and Vishakhapatnam. All the manufacturing facilities have been certified with ISO 14001:2015 Environmental Management System (EMS). All production Divisions are certified to AS 9100D Standard for Aerospace Quality Management System. The Corporate Office located at Hyderabad is certified with ISO 9001:2015 (Quality Management System). The Material Testing Lab, Electronics Lab, and Standard Labs are certified with ISO/IEC 17025:2017, which pertains to the competence of testing and calibration laboratories. The Electronics Division is certified with AFQMS (Air Force Quality Management System). Furthermore, BDL holds the ISO/IEC 27001:2022 certification for Information Security Management Systems (ISMS). Internal audits for all ISO/AS certified divisions are conducted by the company's own internal auditors, while surveillance audits are carried out by certification bodies as per the prescribed frequency.

The company is setting up of additional manufacturing facilities at Ibrahimpatnam (near Hyderabad), Amravati in Maharashtra and Jhansi in UP which will be used to manufacture SAMs (including new generation Missiles), VSHORADs, rockets and propellants for various ATGMs.

2.5 Company Objectives

- i) To attain complete Self-Reliance in the development, production, and lifecycle support of all categories of Missile Systems, including advanced strategic weapons.
- ii) To become competitive in Guided Missiles and Underwater Guided Weapon Technology and Production.
- iii) To maximize utilization of existing production capacities.
- iv) To become a prime competitor in the world market and export products to friendly countries. Position BDL as a globally recognized brand in weapon Systems, setting benchmarks in innovation, quality, and strategic partnerships. Establish BDL as a trusted supplier of export-quality weapon Systems.

2.6 Opportunities & Threats

Opportunities

- i) BDL's multiple years of expertise in manufacturing various defence equipment coupled with its advanced facilities enable the company to expand its market in India and abroad.
- ii) BDL has an experienced senior management and staff having vast experience in defence equipment manufacturing.
- iii) Increased thrust on defence Indigenization under the "Make in India" policy has thrown up more opportunities for BDL. Government initiatives like 'Make in India' and the negative list of imports (Positive Indigenisation List) provide significant opportunities for BDL to develop indigenous capabilities, reduce foreign dependency, and enhance Self-Reliance.
- iv) BDL has a strong supply chain comprising of technically qualified vendors and suppliers to ensure timely delivery of materials.
- v) BDL's primary customer is Ministry of Defence, Government of India (GoI). The GoI has been allocating increased budget for acquiring defence equipment.
- vi) The opening up of export market and 'ease of doing business' have facilitated the company to execute export orders successfully in the recent times and receive more enquiries from other countries. Simplified export regulations and favourable government policies open avenues to attract new customers and improve the order book position.
- vii) Ongoing geopolitical conflicts have increased the demand for affordable, reliable Defence products. BDL's competitive pricing, driven by lower labour and conversion costs, makes it an attractive supplier.

Threats

- i) Slowdown in the economic activities and lower defence budget by GoI could adversely impact BDL's business.
- ii) Higher dependency on single customer i.e. Ministry of Defence (MoD). Reliance on a single domestic customer limits diversification and exposes BDL to market volatility.
- iii) Cancellation of orders can weaken the order book and future revenue. Short closure of orders adversely impacts BDL's ability to maintain a strong order book position.
- iv) Delayed Technology Acquisition: Time-consuming processes to acquire niche technologies and supply disruptions from foreign OEMs, exacerbated by geopolitical conflicts, hinder timely product development.
- v) Opening up of the Defence sector. As private sector participation increases, evaluating long-term business prospects becomes increasingly complex.
- vi) Export Permissions and ToT Issues: Non-clearance of export permissions and reluctance of foreign OEMs to transfer critical technologies cause delays in development and Productionization.
- vii) Idle production lines due to the non-availability of firm orders lead to workforce shifts and operational inefficiencies.

2.7 Key Strategies

Key strategies of BDL are structured into four interdependent strategies: Product Portfolio Strategy, R&D and Technology Strategy, Export Strategy, and Management & Human Resources Strategy. Together, these Strategies aim to establish BDL as a trusted global brand, drive technological Self-Reliance, expand its International footprint, and cultivate a workforce that embodies innovation and excellence.

Each Strategy encapsulates specific objectives and actionable goals to align BDL's growth trajectory with India's Defence planning and the Global Defence landscape. To achieve our strategic goals, the company would focus on the following:

- 2.7.1 Product Portfolio Strategy:** BDL's Product Portfolio Strategy focuses on achieving comprehensive Self-Reliance in the development, production, and lifecycle support of advanced weapon Systems. This includes Missile Systems, Underwater Weapons, and Cutting-Edge Technologies such as Hypersonic Missiles, Directed Energy Weapons, and Autonomous Systems. BDL aims to diversify its product portfolio by exploring dual-use technologies that cater to both defence and civilian applications, thereby expanding its market reach. The vision emphasizes the co-development of critical propulsion Systems, seekers, warheads, and other components to eliminate reliance on foreign supply chains. By 2030-31, BDL aspires to achieve a turnover of ₹10,000 crore, positioning itself as a premier manufacturer of strategic and tactical Defence solutions. The company also intends to carry out process improvements, with the aim of improve our productivity and efficiency of its operations and thereby lower costs. In addition to above, BDL as a part of diversification plan, new verticals have been identified like guided bombs, drone delivered payloads, war head manufacturing, engines for cruise missiles, products for space applications and propellants, rockets, which are expected to create new business opportunities for BDL.
- 2.7.2 R&D and Technology Strategy:** Central to BDL's growth is its commitment to technological leadership and innovation. The Technology and R&D Strategy outlines dual goals of leveraging advanced technologies and achieving Self-Reliance in critical components. While AI, ML, and quantum computing are transformative, the primary emphasis is on indigenizing critical Subsystems of Missiles, such as seekers, edge processors, and advanced propulsion Systems. Joint development with DRDO, academia, and Start-ups, coupled with focused in-house efforts, will enable BDL to reduce dependency on foreign suppliers and secure its position as a leader in Missile technology. BDL will focus on assimilating advanced technologies such as artificial intelligence (AI), machine learning (ML), and Industry 4.0 into its operations and product lines. BDL plans to allocate 9% of its revenue to R&D over the next five years, fostering collaborations with academia, Start-ups, and MSMEs to develop indigenous and critical technologies. The vision also prioritizes increasing intellectual property generation, ensuring self-sufficiency in technology, and fostering a culture of innovation. Through strategic partnerships and technology transfer agreements, BDL aims to co-develop Niche Technologies with Global OEMs and leverage Government-to-Government agreements for critical advancements.
- 2.7.3 Export Strategy:** BDL's Export Strategy is driven by the goal of establishing the company as a trusted supplier of export-quality weapon Systems. By 2029, BDL aims to achieve 25% of its annual turnover from export business, focusing on Anti-Tank Guided Missiles (ATGMs), Surface-to-Air Missiles (SAMs), Air-to-Air Missiles (AAMs) Underwater Weapons, and Avionics Systems. The vision includes strengthening relationships with Friendly Foreign Nations and Nations facing geopolitical challenges, thereby contributing to global security and enhancing India's diplomatic ties. BDL also seeks to integrate into the global supply chains of leading defence companies and establish long-term partnerships for co-production and joint ventures.
- 2.7.4 Management & Human Resources Strategy:** BDL's Management & Human Resources Strategy emphasizes the importance of organizational excellence and workforce development. The company aims to implement advanced technologies such as AI and ML across all departments, including manufacturing, logistics, and product support, to enhance operational efficiency. BDL is committed to continuously upgrading employee skills, fostering a culture of innovation, and building a high-technology absorption quotient among its workforce. By encouraging intrapreneurship and supporting Start-ups, BDL seeks to create an Ecosystem that drives innovation and excellence. The vision also underscores the importance of sustainability, targeting increased renewable energy usage and adherence to global environmental standards.

3. RISKS AND CONCERNS:

Various risks identified with mitigation plans includes risks related to industry, increased market competition, time to market, decline or recession in market segments and product and product inputs prices, cost control and change demand risks. Also risks related to environment, health and safety, IT, R&D, intellectual property and new technical demands such as digitalization/ smart industry are high on the agenda and proactively mitigated, managed with identified improvement activities and followed up on regularly.

- 3.1 Business Risk:** The company operates in a competitive environment with both domestic and international players. Its ability to compete effectively, innovate, and maintain high-quality standards will determine its future success. Furthermore, the company primarily dependent on a single customer, the Indian armed forces through the Ministry of Defence, Government of India (MoD). A decline or reprioritization of the Indian defence budget, the reduction in their orders, termination of contracts or failure to succeed in tendering projects and deviations in the short term and long term policies of the MoD or the Indian armed forces in the future will have a material adverse impact on our business, financial condition, and results of operations, growth prospects and cash flows. BDL also operates in evolving markets where a level playing opportunity is given to private sector which makes it difficult to evaluate its business and future prospects.

Having rich expertise in this business and a well-established infrastructure, the company has ability to handle adverse situations and also geared up to face competition from private sector. Further in order to expand the customer base, BDL is actively exploring export markets with the encouragement from the Government of India. Moreover, the company also kept various diversification plans in place which includes entering into Space Technology and its related products and services.

- 3.2 Policy Risk:** Compliance with regulatory requirements and adherence to quality standards are paramount in the defence industry. The company must ensure strict compliance with regulations and certifications to maintain credibility and trust with its customers. The company is also subject to a number of procurement rules and regulations of the MoD, Government regulations and other rules and regulations. The company's business could be adversely affected in case of any sudden and unforeseen changes in the applicable rules. Restrictions on current and future export of the products and other regulations could adversely affect BDL's business, results of operations and financial conditions

Company is complying with all rules and regulations as per the policies of Government of India and is also taking necessary precautions in advance where possible in anticipation of any changes in the rules.

- 3.3 Operational & Labour Risk:** The company's operations are based out of three units in Telangana and Andhra Pradesh. The loss of, or shutdown of, BDL's operations at any of its units in Telangana and Andhra Pradesh will have a material adverse effect on company's business, financial condition and results of operations. Some of BDL's workforce is represented by labour unions so the company's business could be harmed in the event of a prolonged stoppage of work

The company always continues to maintain cordial relations with all the employees and as such does not foresee material adverse effects in this regard.

- 3.4 Supply Chain Management Risk:** Efficient supply chain management is critical for timely delivery and cost control. BDL needs to optimize its supply chain processes and establish robust partnerships with suppliers to enhance operational efficiency. Company is dependent on multiple key Original Equipment Manufacturers ("OEM") for subassemblies/ components, single source suppliers and sub-contractors. Any failure on the performance of any of them could have a material impact on company's operations

BDL is continuously striving to expand its vendor base and sufficiently safeguarded with liquidated damage clause in case of any failure on the performance. BDL is also developing multiple vendors where single source suppliers are currently existing across its programmes to reduce its dependence and continuity in the programme.

- 3.5 Technology Risk:** To thrive in a rapidly changing environment, BDL should foster a culture of innovation, agility, and adaptability. Embracing emerging technologies and trends while addressing evolving customer needs will be essential for long-term sustainability. BDL manufactures products that incorporate advanced technologies. The introduction of new products and technologies involves risks and the company may not realize the degree or timings of benefits initially anticipated.

The company has further activated its own Research & Development department and started increasing its investment in R&D to encounter technology risks. In addition to this, the company is also concurrently works with DRDO in development of several projects.

4. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY:

The company has implemented comprehensive internal controls and systems that are appropriate for its size and the nature of its business, in order to uphold financial propriety. It has established documented policies and procedures for various functions including Purchase, Sub-contract, Works contract, Accounting, HR, IT, and Security, as well as Sub-delegation of Powers. These policies and procedures are regularly reviewed and updated to align with the evolving business environment.

To ensure the effectiveness of internal controls, the company maintains an in-house Internal Audit Department comprising qualified professionals. The Internal Audit Department is responsible for monitoring and assessing the adequacy and effectiveness of the organization's risk management, control, and governance processes. The scope of the Internal Auditor's work is approved by the Audit Committee of the Board. Additionally, external audit firms are appointed to provide independent assurance and to report on the company's financial statements. The reports from both the Internal Audit Department and the external audit firms are carefully analysed and reviewed by the Audit Committee for their recommendations and guidance.

The company remains committed to adopting global best practices in its processes and controls, aiming to achieve the highest level of Corporate Governance. Continuous efforts are made to enhance internal controls and align them with international standards, ensuring transparency, accountability, and effective risk management.

5. MATERIAL DEVELOPMENTS IN HUMAN RESOURCES, INDUSTRIAL RELATIONS FRONT, INCLUDING NUMBER OF PEOPLE EMPLOYED

5.1 The manpower strength of the Company as on 31 March 2025 is as under:

Particulars	Non-Executives	Executives	Total
Male	1338	648	1986
Female	172	111	283
Total	1510	759	2269
Previous Year	1621	769	2401

5.2 Industrial Relations

The company places great importance on maintaining positive working relations between management and trade unions, striving to create a congenial environment within the organization. In line with this commitment, the Central Labour Department conducted a Verification of membership of Trade Union through Secret Ballot Elections during the year.

The management, in collaboration with the recognized trade union, establishes and maintains effective procedures for negotiation, consultation, and communication regarding the terms and conditions of employment. These procedures aim to ensure the speedy settlement of disputes and foster a harmonious work environment. The recognized trade union acts as the representative of the employees in consultations and negotiations with the management, specifically in matters related to industrial relations and employment.

Through these collaborative efforts, the company strives to create a framework for open dialogue, mutual understanding, and the resolution of issues in a fair and transparent manner. By promoting strong working relations with the trade unions, the company aims to foster a conducive and productive work atmosphere for its employees.

6. ENVIRONMENTAL MEASURES:

During the year, your company has constructed and implemented 1.34 lakhs (Cap.) artificial recharge structure as part of Jal Sanchay Jan Bhagidari initiative under Jal Shakti Abhiyan 2024. The company is committed to contributing to a clean and green environment by integrating best practices that promote sustainability and environmental responsibility. A systematic approach is followed, focusing on implementing cleaner technologies and adopting the principles of recycle, reuse, and reduce.

To ensure environmental protection, the company operates effluent treatment plants and sewage treatment plants. These facilities play a vital role in treating and managing wastewater and sewage generated by the company's operations. Additionally, the company actively engages in various environmental conservation activities such as water conservation, tree plantation, proper disposal of hazardous waste and metal scrap, and landscaping. These initiatives contribute to preserving natural resources and reducing the environmental impact of the company's activities.

The company emphasizes the efficient utilization of resources by utilizing treated effluent water and domestic water in its operations. This approach helps in conserving water and reducing the strain on freshwater sources. Regular assessments of pollution levels and environmental performance are conducted through ISO 14001 core team meetings, internal audits, and management review meetings. These activities ensure ongoing monitoring and improvement of the company's Environmental Management System.

Furthermore, annual surveillance audits are conducted at all three units of the company to evaluate the effectiveness of the Environmental Management System. This systematic review process helps identify areas for improvement and ensures compliance with environmental regulations and standards.

Through these concerted efforts, the company aims to minimize its environmental footprint, promote sustainable practices, and contribute to a cleaner and greener environment for the benefit of present and future generations.

7. FOREIGN EXCHANGE CONSERVATION

The company is striving constantly to conserve foreign exchange by reducing import of components and subsystems from OEMs by increasing indigenous content in the assembly of final products.

8. FUTURE OUTLOOK

As we look ahead to the financial year 2025–26, Bharat Dynamics Limited (BDL) is well-positioned to build upon its strategic strengths and play a pivotal role in advancing India's defence self-reliance goals under the Viksit Bharat Vision 2047. Our unwavering commitment to innovation, quality, and operational excellence continues to drive our transformation into a modern, agile, and globally competitive defence enterprise.

The Global and National security environment continues to evolve rapidly, driving increased demand for advanced defence systems. In this context, BDL is aligning its strategies to capitalize on emerging opportunities, both within India and across friendly foreign nations. We are proactively engaging with the Indian Armed Forces to support their modernization efforts, while simultaneously expanding our footprint in the global defence export market through targeted collaborations and offset partnerships.

To meet the rising demand and ambitious indigenization goals, BDL is taking decisive steps to enhance production capacities, including modernization of existing facilities, establishing of the new facilities and transitioning to Industry 4.0 standards. This includes the adoption of digital manufacturing technologies, smart automation, and AI-driven analytics, aimed at improving efficiency, reducing cycle times, and ensuring high product reliability.

We are also advancing our R&D ecosystem to develop next-generation missile systems and allied defence technologies. Joint development projects with DRDO and FOEMs remain a cornerstone of our growth strategy. In parallel, we are pursuing technology acquisition and co-development opportunities through cross-investments and strategic partnerships, enabling us to bridge critical capability gaps in high-end technologies.

We are conscious of external risks, including geopolitical volatility, global supply chain disruptions, and currency fluctuations. However, with a robust order book, a healthy pipeline of anticipated Orders, and a strong liquidity position, BDL is equipped to navigate these uncertainties. Continued policy support for defence indigenization, Make-in-India initiatives, and increased budgetary allocations further strengthen the operating environment for BDL.

BDL will continue to focus on organizational capacity building, talent development, and fostering a high-performance culture across the company. With a skilled workforce, solid institutional foundation, and a clear strategic direction, BDL is confident in its ability to deliver value to stakeholders, contribute meaningfully to national defence preparedness, and emerge as a global player in the defence manufacturing sector.

The Government of India has cleared a wide range of BDL products for export. To tap into the global market, the company has established an export cell within its Business Development Division. This cell is tasked with identifying potential markets, exploring export opportunities, and formulating country-specific strategies, including the identification of suitable products for each market. BDL offers these products that are designed and manufactured indigenously at competitive price.

BDL has already made in-roads into the Global Defence Market and intends to increase its presence by having customized solutions specific to the customers. BDL has also emerged as an effective solution provider for life cycle management of these products. BDL intends to synergize with the local defence industry of our customers to build a robust life cycle support provided locally.

BDL recognizes the critical necessity of optimizing its production lines to enhance efficiency and productivity. By streamlining processes and integrating cutting-edge technologies, BDL endeavours to elevate its manufacturing capabilities, ensuring timely delivery without compromising on quality standards.

Looking forward, the future outlook of your company remains promising with substantial order book, strategic growth initiatives, and emphasis on technological innovation position the company for continued success in the evolving defence landscape.

INDEPENDENT AUDITORS' REPORT

To the Members of Bharat Dynamics Limited

Report on the Audit of Standalone Financial Statements**Opinion**

We have audited the accompanying Standalone Financial Statements of **Bharat Dynamics Limited ('the company')**, which comprise the Balance Sheet as at 31 March 2025, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement, the Statement of Changes in Equity for the year then ended, and notes to the standalone financial statements, including a summary of Material Accounting Policies and other explanatory information (hereinafter referred to as "Standalone Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013, as amended ('the Act') in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards ('Ind AS') specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March, 2025 and its profit (including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the "Auditors' Responsibilities for the Audit of the Standalone Financial Statements" section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the Standalone Financial Statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the Standalone Financial Statements.

Emphasis of matter

We draw attention to the following matters in the notes to the Standalone Financial Statements:

- a) note 38(7) which describes inventory not moved for more than five years amounting to ₹ 8331.44 lakhs (₹ 8338.85 lakhs as of 31 March 2024) for which no provision for

redundancy were made as is required by the company's accounting policy for the reasons stated there at;

- b) note 28 which describes the recognition of a provision for onerous contracts amounting to ₹13,461.18 Lakh during the quarter ended 31 December 2024, and an additional provision of ₹ 678.96 Lakh during the quarter ended 31 March 2025, in accordance with Ind AS 37 – Provisions, Contingent Liabilities, and Contingent Assets

Our conclusion is not modified in respect of these matters

Key Audit Matters

1. Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the year ended 31 March 2025. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.
2. For each matter below, our description of how our audit addressed the matter is provided in that context. We have determined the matters described below to be the key audit matters to be communicated in our report.

Information other than the Standalone Financial Statements and auditors' report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the standalone financial statements and our auditors' report thereon. The Annual Report is expected to be made available to us after the date of this auditors' report.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of management and those charged with governance for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other

comprehensive income, changes in equity and cash flows of the Company in accordance with accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent, and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements, that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, the Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intend to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate Internal Financial Controls with reference to Standalone Financial Statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of Board of Director's use of the going concern basis of accounting and, based on the audit evidence obtained whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the Standalone Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone Financial Statements, including the disclosures, and whether the Standalone Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Standalone Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

(b) As stated in note no. 38(9) (b) to the accompanying standalone financial statements, the Board of Directors of the Company have proposed final dividend for the year ended 31 March 2025 which is subject to the approval of the members at the ensuing Annual General Meeting. The dividend declared is in accordance with section 123 of the Act to the extent it applies to declaration of dividend.

(c) The interim dividend declared and paid by the company is in accordance with section 123 of the Act.

vi. Based on our examination which included test checks, the company has used accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with. Additionally, the audit trail has been preserved by the company as per the statutory requirements for record retention.

3. As required by section 143(5) of the Act, we give in 'Annexure-3', a statement on the matters specified in the directions issued by the Comptroller and Auditor General of India in respect of the Company.

Annexure-1 referred to in paragraph 1 under "Report on Other legal and Regulatory Requirements" section of our report of even date to the members of Bharat Dynamics Limited on the Standalone Financial Statements for the year ended 31 March 2025

In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit and, to the best of our knowledge and belief, we report that:

- (i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment, right of use assets and investment property.
- (B) The Company has maintained proper records showing full particulars of intangible assets.
- (b) The Company has a regular program of physical verification of its property, plant and equipment, right of use assets and investment property under which these assets are physically verified in a phased manner over a period of five years, which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. In accordance with this program, certain property, plant and equipment were physically verified during the year and no material discrepancies were noticed on such verification.
- (c) The title deeds of all the immovable properties (other than properties where the Company is the lessee and the lease agreements are duly executed in favour of the lessee) are held in the name of the Company, except for the properties as stated below for which the Company's management is in the process of getting registered in the name of the Company and for incorporation in revenue records:

Description of the Property	Gross carrying value (₹ in lac)	Held in Name of	Whether promoter, director or their relative or employee	Period since held	Reason for not being held in name of the Company

- (d) The Company has not revalued its Property, Plant and Equipment (including right of use assets) or intangible assets or both during the year.
- (e) No proceedings have been initiated or are pending against the Company for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended) and rules made thereunder during the year.
- (ii) (a) The management has conducted physical verification of inventory at reasonable intervals during the year, including inventory lying with third parties etc. In our opinion, the coverage and procedure of such verification by the management is appropriate and discrepancies of 10% or more in the aggregate for each class of inventory as compared to book records were not noticed on such physical verification.
- (b) The Company has been sanctioned a Fund Based working capital overdraft limit of ₹ 15.00 Cr by Union Bank of India against Fixed Deposits and Non-Fund based working capital limit of ₹ 400 Cr by Union Bank of India and ₹ 200 Cr by State Bank of India against floating charge registered as stated under note 38(12) to the standalone financial statements. No quarterly statements, in respect of these facilities are required to be filed by the Company with these banks and accordingly (b) of clause (ii) of para 3 of the order are not applicable.
- (iii) The Company has not made any investment in, provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured to companies, firms, Limited Liability Partnerships (LLPs) or any other parties during the year thereby sub clause (a), (b), (c), (d), (e) and (f) of clause (iii) of para 3 of the order are not applicable.
- (iv) The company being a Government Company as defined under section 2(45) of the Act, pursuant to the Notification No. GSR 463(E) dated 5 June 2015 issued by the Ministry of Corporate Affairs, Government of India, the provisions of section 185 and 186 of the Act, are not applicable to the company.
- (v) The Company has not accepted any deposits or there are no amounts which have been deemed to be deposits within the meaning of sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Thereby the requirement for reporting under clause 3(v) of the Order is not applicable to the Company.

Annexure-2 referred to in paragraph 2 (f) under "Report on Other legal and Regulatory Requirements" section of our report of even date to the members of Bharat Dynamics Limited on the Standalone Financial Statements

Independent Auditors' Report on the Internal Financial Controls with reference to the Standalone Financial Statement under Clause (i) of Sub-section 3 of Section 143 of the Act.

We have audited the internal financial controls with reference to the Standalone Financial Statements of the company as of 31 March 2025 in conjunction with our audit of the Standalone Financial Statements of the Company for the year ended on that date.

Responsibilities of management and those charged with governance for internal financial controls

The Company's Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting ("the Guidance Note") issued by ICAI. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the company's business, including adherence to the company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' responsibility for the audit of the internal financial controls with reference to financial statements

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the ICAI prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the Guidance Note issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to Standalone Financial Statements and their operating effectiveness. Our audit of internal financial controls with reference to Standalone Financial Statements included obtaining an understanding of internal financial controls with reference to Standalone Financial Statements, assessing the risk that a material weakness

exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to Standalone Financial Statements.

Meaning of Internal Financial Controls with reference to the Standalone Financial Statements

A company's internal financial controls with reference to Standalone Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Standalone Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to Standalone Financial Statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Standalone Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Standalone Financial Statements.

Inherent limitations of Internal Financial Controls with reference to Standalone Financial Statements

Because of the inherent limitations of internal financial controls with reference to Standalone Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Standalone Financial Statements to future periods are subject to the risk that the internal financial controls with reference to Standalone Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to standalone financial statements and such internal financial

**COMMENTS OF THE COMPTROLLER AND AUDITOR GENERAL OF INDIA
UNDER SECTION 143(6)(b) OF THE COMPANIES ACT, 2013 ON THE
FINANCIAL STATEMENTS OF BHARAT DYNAMICS LIMITED,
HYDERABAD FOR THE YEAR ENDED 31 MARCH 2025**

The preparation of Financial Statements of **Bharat Dynamics Limited, Hyderabad** for the year ended 31 March 2025 in accordance with the financial reporting framework prescribed under the Companies Act, 2013 (Act) is the responsibility of the management of the company. The statutory auditor appointed by the Comptroller and Auditor General of India under section 139(5) of the Act is responsible for expressing opinion on the financial statements under section 143 of the Act based on Independent audit in accordance with the standards on auditing prescribed under section 143(10) of the Act. This is stated to have been done by them vide their Audit Report dated 27 May 2025.

I, on behalf of the Comptroller and Auditor General of India, have conducted a supplementary audit of the financial statements of **Bharat Dynamics Limited, Hyderabad** for the year ended 31 March 2025 under section 143(6)(a) of the Act. This supplementary audit has been carried out independently without access to the working papers of the statutory auditors and is limited primarily to inquiries of the statutory auditors and company personnel and a selective examination of some of the accounting records.

On the basis of my supplementary audit nothing significant has come to my knowledge which would give rise to any comment upon or supplement to statutory auditors' report under section 143(6)(b) of the Act.

For and on behalf of the
Comptroller & Auditor General of India

Material Accounting Policy Information

1. BASIS OF PREPARATION OF FINANCIAL STATEMENTS

1.1 Compliance with Ind AS:

The financial statements comply in all material aspects with the Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) rules, 2015], as amended from time to time and other relevant provisions of the Act.

1.2 Historical cost convention:

The financial statements are prepared under historical cost basis, except for the following:

certain financial assets and liabilities (including derivative instruments) and contingent consideration that is measured at fair value;

defined benefit plans – plan assets measured at fair value

1.3 Use of estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in India requires management, where necessary, to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised.

2. FOREIGN CURRENCY TRANSLATION

2.1 Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates ('the functional currency'). The financial statements are presented in Indian rupee (INR), which is Bharat Dynamics Limited's functional and presentation currency.

2.2 Transactions and Balances

- i) Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are recognized in profit and loss.
- ii) Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss.
- iii) Liability for deferred payments (and receivable from Indian army and ordnance factory) including interest thereon, on supplies/ services from the USSR (erstwhile) is set up at the rate of exchange notified by the Reserve Bank of India for deferred payments including interest thereon under the protocol arrangements between the Government of India and Government of Russia. The differences due to fluctuations in the rate of exchange are charged to revenue.

3. REVENUE RECOGNITION:

A. Revenue from Contract with Customers

- (i) Revenue is recognized when (or as) the company satisfies a performance obligation.

(ii) Satisfaction of performance obligation over time

- a. Revenue is recognised overtime where the transfer of control of goods or services take places over time by measuring the progress towards complete satisfaction of that performance obligation, if one of the following criteria is met:

- the company's performance entitles the customer to receive and consume the benefits simultaneously as the company performs
 - the company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced
 - the company's performance does not create an asset with an alternative use to the company and the company has an enforceable right to payment including a reasonable profit margin for performance completed to date.
- b. Progress made towards satisfying a performance obligation is assessed based on Input Method on the ratio of actual costs incurred on the contract up to the reporting date to the estimated total costs expected to complete the contract. If the outcome of the performance obligation cannot be estimated reliably and where it is probable that the costs will be recovered, revenue is recognised to the extent of costs incurred.
- c. In case of AMC contracts, where passage of time is the criteria for satisfaction of performance obligation, revenue is recognised using the output method.

(iii) Satisfaction of performance obligation at a point in time

- a. In respect of cases where the transfer of control does not take place over time, the company recognises the revenue at a point in time when it satisfies the performance obligations.
- b. The performance obligation is satisfied when the customer obtains control of the asset. The indicators for transfer of control include the following:
- the company has transferred physical possession of the asset
 - the customer has legal title to the asset
 - the customer has accepted the asset
 - when the company has a present right to payment for the asset
 - The customer has the significant risks and rewards of ownership of the asset. The transfer of significant risks and rewards ownership is assessed based on the Incoterms of the contracts.

Ex-Works contract – In case of Ex-works contract, revenue is recognised when the specified goods are unconditionally appropriated to the contract after prior inspection and acceptance, if required.

FOR Contracts – In the case of FOR contracts, revenue is recognised when the goods are handed over to the carrier for transmission to the buyer after prior inspection and acceptance, if stipulated, and in the case of FOR destination contracts, if there is a reasonable expectation of the goods reaching destination within the accounting period.

Bill and hold Sales:

Bill and hold sales is recognised when all the following criteria are met:

- the reason for the bill and hold sales is substantive
- the product is identified separately as belonging to the customer
- the product is currently ready for physical transfer to the customer
- the company does not have the ability to use the product or to direct it to another customer

(iv) Measurement

- a. Revenue is recognized at the amount of the transaction price that is allocated to the performance obligation.
- The transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amount collected on behalf of third parties and net of estimated liquidated damages.
- Exchange rate variation and any other additional consideration is recognised based on contractual terms of the contract.

- b. The company's obligation to replace or repair faulty goods under the standard warranty terms is recognized as a provision and is not adjusted against transaction price as the customer does not have option to purchase warranty separately.
- c. In case where the contracts involve multiple performance obligations, the company allocates the transaction price to each performance obligation on the relative stand-alone selling price basis.

Bundled Contracts - In case of a Bundled contract, where separate fee for installation and commissioning or any other separately identifiable component is not stipulated, the Company applies the recognition criteria to separately identifiable components (sale of goods and installation and commissioning, etc.) of the transaction and allocates the revenue to those separate components based on stand-alone selling price.

Multiple Elements - In cases where the installation and commissioning or any other separately identifiable component is stipulated and price for the same agreed separately, the Company applies the recognition criteria to separately identified components (sale of goods and installation and commissioning, etc.) of the transaction and allocates the revenue to those separate components based on their stand-alone selling price.

- d. If the stand-alone selling price is not available the company estimates the stand alone selling price.

(v) Significant financing component

Advances received towards execution of Defence related projects are not considered for determining significant financing component since the objective is to protect the interest of the contracting parties.

In respect of other contracts, the existence of significant financing component is reviewed on a case to case basis.

(vi) Customer financed assets:

The Customer Financed Assets (CFA) are those assets cost of which is funded by the customer, fully or in part. Customer may or may not obtain control over the CFA. The funding by customer is recognised as revenue synchronising it in line with completion of performance obligations in accordance with contractual terms. The expenditure incurred by the company is recognised as per GAAP.

a. Where the company has obtained control over the assets funded by customer:

The assets financed by customer are recognised initially at fair value. The corresponding revenue in respect of a contract is recognised to the extent of executed quantity in proportion to the existing order quantity plus additional quantity, if any, for which orders are anticipated as on the date of receipt of the contract from customer.

b. Where the company has not obtained control over the assets funded by customer:

The expenditure incurred in respect of assets funded by the customer is initially recognised as inventory and revenue is recognised on transfer of control of the asset

B. Other Income:

Recognition of other income is as follows

i) Interest income:

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

ii) Dividend:

Dividend income is recognized when the Company's right to receive the payment is established.

4. GOVERNMENT GRANTS

4.1 Grants from the government are recognized at their fair value where there is reasonable assurance that grant will be received and the Company will comply with all attached conditions.

4.2 Government grants relating to income are deferred and recognized in the profit and loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income.

4.3 Grants related to non-depreciable assets may also require the fulfilment of certain obligations and would then be recognised in profit or loss over the periods that bear the cost of meeting the obligations.

4.4 Government Grants received either as subsidy or otherwise for acquisition of depreciable assets are accounted as deferred income. If the grant/subsidy is absolute, amount corresponding to the depreciation is treated as income over the life of the asset. If the grant/subsidy is attached with any conditions, such as repayment, income is accounted as per the terms of the grant/subsidy.

5. INCOME TAX

5.1 The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rates adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

5.2 Current tax:

The current income tax charge is calculated on the basis of tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Company operates and generates taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

5.3 Deferred tax:

- i) Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognized if they arise from initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from the initial recognition of asset or liability in a transaction other than business combination that at the time of the transaction affects neither accounting profit nor the taxable profit (tax loss). Deferred income tax is determined using the tax rates (and laws) that have been enacted or substantively enacted at the end of the reporting period and are expected to apply when the related deferred income tax assets is realized or the deferred income tax liability is settled.
- ii) Deferred tax assets are recognized for all deductible temporary differences and unused losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses. Deferred tax asset is also recognised for the indexation benefit on land available for taxation purpose since it results in a temporary difference.
- iii) Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the liability simultaneously.
- iv) Current and deferred tax is recognized in profit or loss, except to the extent that it relates to the items recognized in other comprehensive income or directly equity. In this case, the tax is also recognized in other comprehensive income or directly equity, respectively.

6. LEASES

6.1 Company as a lessee:

Contracts with third party, which give the company the right of use in respect of an Asset, are accounted in line with the provisions of Ind AS 116 – “Leases” if the recognition criteria as specified in the Accounting standard are met.

Lease payments associated with short term lease (term of twelve months or less) and lease in respect of low value assets are charged off as expenses on straight line basis over lease term or other systematic basis, as applicable.

At commencement date, the value of “right of use” is capitalised at the present value of outstanding lease payments plus any initial direct cost and estimated cost, if any, of dismantling and removing the underlying asset.

Liability for lease is created for an amount equivalent to the present value of outstanding lease payments. Subsequent measurement, if any, is made using cost model.

Each lease payment is allocated between the liability created and finance cost. The finance cost is charged to the statement of profit and loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

The right of use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight line basis.

The lease payments are discounted using the interest rate implicit in the lease, if that rate can be determined, or the company's incremental borrowing rate.

Lease modifications, if any, are accounted as a separate lease if the recognition criteria specified in the standard are met.

6.2 Company as a Lessor:

Lease are classified as finance or operating lease based on the recognition criteria specified in Ind AS 116 – Leases.

a) Finance Lease:

At commencement date, amount equivalent to the "net investment in the lease" is presented as a receivable. The implicit interest rate is used to measure the value of the "net investment in Lease"

Each lease payment is allocated between the Receivable created and finance income. The finance income is recognised in the statement of profit and loss over the lease period so as to reflect a constant periodic rate of return on the net investment in lease.

The asset is tested for de-recognition and impairment requirements as per Ind AS 109- Financial Instruments.

Lease modifications, if any, are accounted as a separate lease if the recognition criteria specified in the standard are met.

b) Operating lease:

The company recognises lease payments from operating leases as income on either a straight line basis or another systematic basis, if required.

Lease modifications, if any, are accounted as a separate lease if the recognition criteria specified in the standard are met.

A lease is classified at the inception date as a finance lease or operating lease.

7. INVENTORIES

- 7.1 Inventories are valued at lower of cost and net realizable value. The cost of raw material, components and stores are assigned by using the actual weighted average cost formula and those in transit at cost to date. In the case of stock-in-trade and work-in-progress, cost includes material, labour and related production overheads.
- 7.2 Stationery, uniforms, welfare consumables, medical and canteen stores are charged off to revenue at the time of receipt.
- 7.3 Raw-materials, Components, Construction Materials, Loose Tools and Stores and Spare Parts declared surplus/ unserviceable/ redundant are charged to revenue.
- 7.4 Provision for redundancy is made in respect of closing inventory of Raw materials and Components, Work in progress, Finished Goods, Stores and spare parts, Loose tools and Construction Materials non-moving for more than 5 years. Besides, where necessary, adequate provision is made for redundancy of such inventory in respect of completed/ specific projects and other surplus/ redundant materials pending transfer to salvage stores.

8. FINANCIAL INSTRUMENTS

8.1 Financial Assets:

All financial assets are recognised on trade date when the purchase of a financial asset is under a contract whose term requires delivery of the financial asset within the timeframe established by the market concerned. Financial assets are initially measured at fair value, plus transaction costs, except for those financial assets which are classified as at fair value through profit or loss

(FVTPL) at inception. All recognised financial assets are subsequently measured in their entirety at either amortized cost or fair value.

i) Classification of financial assets:

The Company classifies its financial assets in the following measurement categories:

- o those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- o those measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income. The Company reclassifies debt investments when and only when its business model for managing those assets changes.

ii) Measurement:

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

a) Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. The Company classifies its debt instruments as:

- (a)(i) Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.
- (a)(ii) Fair value through other comprehensive income (FVOCI): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit and loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in other income using the effective interest rate method.
- (a)(iii) Fair value through profit or loss: Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented net in the statement of profit and loss within other gains/(losses) in the period in which it arises. Interest income from these financial assets is included in other income.

b) Equity instruments

- (b)(i) The Company subsequently measures all equity investments at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss. Dividends from such investments are recognised in profit or loss as other income when the Company's right to receive payments is established.
- (b)(ii) Changes in the fair value of financial assets at fair value through profit or loss are recognised in other gain/(losses) in the statement of profit and loss. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

(iii) Impairment of financial assets:

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables the Company applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

Time barred dues from the government / government departments / government companies are generally not considered as increase in credit risk of such financial asset.

(iv) Derecognition of financial assets

A financial asset is derecognized only when

- The Company has transferred the rights to receive cash flow from the financial asset or
- retains the contractual rights to receive the cash flows of the financial assets, but assumes a contractual obligation to pay cash flows to one or more recipients

Where the company has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognized.

Where the company has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

v) Trade receivables:

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. If collection is expect to be collected within a period of 12 months or less from the reporting date (or in the normal operating cycle of the business if longer), they are classified as current assets otherwise as non-current assets.

Trade receivables are measured at their transaction price unless it contains a significant financing component in accordance with Ind AS 115 (or when the entity applies the practical expedient) or pricing adjustments embedded in the contract.

Loss allowance for expected life time credit loss is recognised on initial recognition.

8.2 Financial liabilities and equity instruments issued by the Company

Classification

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

i) Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

ii) Financial liabilities

Financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs.

Financial liabilities are subsequently measured at amortized cost using the effective interest method, with interest expense recognised on an effective yield basis.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

iii) Trade and other payables

These amounts represent liabilities for goods and services provided to the Company. Trade and other payables are presented as current liabilities if payment is due within 12 months after the reporting period otherwise as non-current. They are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.

iv) Derivatives

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently re-measured to their fair value at the end of each reporting period. The derivatives that are not designated as hedges are accounted for at fair value through profit and loss and are included in other gains/ (losses).

a) Embedded derivatives

Derivatives embedded in a host contract that is an asset within the scope of Ind AS 109 are not separated. Financial Assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Derivatives embedded in all other host contract are separated only if economic characteristics and risks of the embedded derivatives are not closely related to the economic characteristics and risks of the host contract and are measured at fair value through profit and loss. Embedded derivatives closely related to the host contract are not separated.

b) Embedded foreign currency derivatives

Embedded foreign currency derivatives are not separated from the host contract if they are closely related. Such embedded derivatives are closely related to the host contract, if the host contract is not leveraged, does not contain any option feature and requires payments in one of the following currencies:

- The functional currency of any substantial party to that contract,
- The currency in which the price of the related good or service that is acquired or delivered is routinely denominated in commercial transactions around the world,
- A currency that is commonly used in contracts to purchase or sell non-financial items in the economic environment in which the transaction takes place (i.e. relatively liquid and stable currency)

Foreign currency embedded derivatives which do not meet the above criteria are separated and the derivative is accounted for at fair value through profit and loss.

8.3 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

9. CASH AND CASH EQUIVALENTS:

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts.

Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

10. FAIR VALUE MEASUREMENT

10.1 The Company measures certain financial instruments, such as derivatives and other items in its financial statements at fair value at each balance sheet date.

10.2 All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within fair value hierarchy based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets and liabilities.

Level 2 – Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. Derived from prices).

Level 3 – Inputs for the assets and liabilities that are not based on observable market data (unobservable inputs).

10.3 For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

11. PROPERTY, PLANT AND EQUIPMENT

11.1 Measurement

- i. Land is capitalised at cost to the Company. Development of land such as levelling, clearing and grading is capitalised along with the cost of building in proportion to the land utilized for construction of buildings and rest of the development expenditure is capitalised along with cost of land. Development expenditure incurred for the purpose of landscaping or for any other purpose not connected with construction of any building is treated as cost of land.
- ii. All other items of property, plant and equipment are stated at historical cost less depreciation. Historical costs includes expenditure that is directly attributable to the acquisition of items.
- iii. Subsequent costs are included in the asset's carrying amount and recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit and loss during the reporting period in which they are incurred.
- iv. Where the cost of a part of the asset is significant to the total cost of the asset and useful life of that significant part is different from the useful life of the remaining asset, useful life of that significant part is determined separately and the significant part is depreciated on straight line method over its estimated useful life.

11.2 Depreciation method, estimated useful life and residual value:

- i. Depreciation is calculated using the straight line method to allocate their cost, net of residual values, over the estimated useful life.
- ii. The useful lives have been determined to be equal to those prescribed in Schedule II to the Companies Act; 2013.
- iii. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

11.3 Disposal

Gains and losses on disposal are determined by comparing net sale proceeds with carrying amount. These are included in statement of profit and loss.

12. INTANGIBLE ASSETS:

12.1 Licences

Separately acquired licences are shown at historical cost. They have a finite useful life and are subsequently carried at cost less accumulated amortization and impairment losses.

12.2 Computer software

- a) The cost of software (which is not an integral part of the related hardware) acquired for internal use and resulting in significant future economic benefits-, is recognised as an Intangible Asset in the books of accounts when the same is ready for use. Intangible Assets that are not yet ready for their intended use as at the Balance Sheet date are classified as "Intangible Assets under Development.
- b) Cost associated with maintaining of software programs are recognized as an expense as incurred.
- c) Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Company are recognized as intangible assets when the following criteria are met:

- It is technically feasible to complete the software so that it will be available for use
 - Management intends to complete the software and use or sell it
 - There is an ability to use or sell the software
 - It can be demonstrated how the software will generate probable future economic benefits
 - Adequate technical, financial and other resources to complete the development and to use or sell the software are available, and
 - The expenditure attributable to the software during its development can be reliably measured.
- d) Directly attributable costs that are capitalized as part of the software include employee costs and an appropriate portion of relevant overheads.
- e) Capitalized development costs are recorded as intangible assets and amortized from the point at which the asset is available for use.

12.3 Research and development

Research expenditure and development expenditure that do not meet the criteria in 12.2(c) above are recognized as an expense as incurred. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period.

In the event of the Company financed project(s) being foreclosed/ abandoned, the expenditure incurred up to the stage of foreclosure/ abandonment is charged off to revenue in the year of foreclosure/ abandonment.

12.4 Amortization methods and periods

The Company amortizes intangible assets with a finite useful life using the straight-line method over the following periods:

Licences	Useful Life/Production
Computer software	3 years

13. INVESTMENT PROPERTY:

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Company, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

14. NON-CURRENT ASSETS (OR DISPOSAL GROUPS) HELD FOR SALE AND DISCONTINUED OPERATIONS:

14.1 Non-current assets (or disposal groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and contractual rights under insurance contracts, which are specifically exempt from this requirement.

14.2 An impairment loss is recognised for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset (or disposal group) is recognised at the date of de-recognition.

14.3 Non-current assets (including those that are part of a disposal group) are not depreciated or amortized while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognised.

14.4 Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

14.5 A discontinued operation is a component of the entity that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the statement of profit and loss.

15. IMPAIRMENT OF ASSETS:

15.1 Intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount.

15.2 The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

16. PROVISIONS, CONTINGENT ASSETS AND CONTINGENT LIABILITIES

16.1 Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognized for future operating losses.

16.2 Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

16.3 Provisions are measured at the present value of the management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provisions due to the passage of time is recognized as interest expense.

16.4 Warranty: Warranty on goods sold, wherever applicable, commences once the sale is complete and accordingly provision for such warranty is made. The period, terms and conditions of warranty as per the relevant contract are taken into consideration while determining the provision for such sales.

16.5 Provision for Onerous Contract: A provision for onerous contracts is recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognizes any impairment loss on the assets associated with that contract.

17. EMPLOYEE BENEFITS

17.1 Short-term obligations

Liabilities for wages and salaries, including other monetary and non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

17.2 Other long term employee benefit obligations

The liability for vacation leave is not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Re-measurements as a result of experience adjustments and changes in actuarial assumptions are recognised in profit or loss.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

17.3 Post-employment obligations

The Company operates the following post-employment schemes:

- (a) Defined benefit plans such as Gratuity and contribution towards Provident Fund under the PF Act; and
- (b) Defined contribution plans namely Retired Employee Medical Scheme (REMI)/Post Superannuation Medical Benefit (PSMB), Death Relief Fund (DRF), Employee State Insurance Scheme (ESI) and Pension Scheme(s).

a) Defined benefit plans

The liability or assets recognized in the balance sheet in respect of defined benefit plans is the present value of the defined benefit obligations at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation denominated in INR is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Re-measurement gains and losses arising from experience adjustments and change in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in profit or loss as past service cost.

b) Defined contribution plans

The Company pays contributions to trusts established as per local regulations and also to publicly administered funds as per local regulations. The Company has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined contribution plans and the contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available.

The Company's contribution paid/ payable to Company approved Retired Employee Medical Scheme (REMI)/ Post superannuation Medical Benefit(PSMB), Death Relief Fund (DRF), Employee State Insurance Scheme (ESI) and Pension Scheme are charged to revenue.

17.4 Termination Benefits

Termination benefits are payable when employment is terminated by the Company before the normal retirement date, or when an employee accepts voluntary redundancy in exchange for these benefits. The Company recognizes termination benefits at the earlier of the following dates: (a) when the Company can no longer withdraw the offer of those benefits; and (b) when the entity recognizes costs for a restructuring that is within the scope of Ind AS 37 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefit are measured based on the number of employees expected to accept the offer. Termination Benefits falling due more than 12 months after the end of the reporting period are discounted to present value.

Compensation paid to Employees under Voluntary Retirement Scheme (VRS) is charged to Statement of Profit and Loss in the year of retirement.

18. CONTRIBUTED EQUITY

Equity shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

19. DIVIDENDS

Provision is made for the amount of any dividend declared, being appropriately authorized and no longer at the discretion of the entity, on or before the end of the reporting period but not distributed at the end of the reporting period.

20. EARNINGS PER SHARE

20.1 Basic earnings per share

Basic earnings per share is calculated by dividing:

The profit attributable to owners of the Company by the weighted average number of equity shares outstanding during the financial year, adjusted for bonus elements in equity shares issued during the year and excluding treasury shares

20.2 Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- The after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- The weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

Significant Judgement:		
1. Advanced Materials (Defence) Testing Foundation and Electronic Warfare (Defence) Testing Foundation are not-for-profit companies registered under Section 8 of the Companies Act, 2013. These entities are not considered for preparation of consolidated financial statements as the company does not have rights to variable returns from its involvement, other than equity investment.		
2. Investments in AP Gas Power Corporation Limited have been designated as fair value through profit and loss. Fair value is considered based on Net worth of investee as the shares are unquoted and the company does not have a significant influence in the investee. However, during 2021-22, APGPCL received an adverse arbitration award, the implementation of which is likely to erode the networth of APGPCL. Accordingly Fair value of the investment is considered as 'Nil'.

Refer note 38(15): Fair value measurement.		
Significant Judgement:		
Deferred Debts:		
Deferred debts are receivables from the Indian Army and Armoured Vehicles Nigam Limited (erstwhile Ordnance factory). The receivable is denominated in Indian Rupees (INR) and receivable in equal instalments over 45 years commencing from 01.04.1992. As per the agreement, the receivable is adjusted on the basis of rates of Special Drawing Rights (SDR), issued by the International Monetary Fund (IMF). As such the receivable does not satisfy the Solely Payment of Principal and Interest (SPPI) criteria as set out in Ind AS 109. Hence, the receivable is measured at fair value through profit and loss. Deferred debt is discounted at 8% to arrive at the fair value on initial recognition and the difference between the fair value and the total deferred debt is considered as deferred expense. Subsequently this is carried at fair value through profit and loss.

Significant judgements:

- 1) Deferred credit: Deferred credit represents the principal credit portion (at the base rate) of the 45 years (commencing from 01.04.1992) deferred credit provided by the Russian government. The deferred credit is a financial liability, therefore shall be recognised at fair value. The fair value is ascertained by discounting the future cash outflows at the rate of 8%. The company considers 8% to be the cost of capital.
- 2) Embedded derivative: The increase in liability due to movement in SDR rates is assessed to be an embedded derivative. The embedded derivative is accounted at the fair value on each reporting date through Profit and loss. The fair value is considered to be the adjusted rupee value of the SDR unit as on the reporting date according to the agreement.

Warranties:

Warranty estimates are established using historical information on the nature, frequency and average cost of warranty claims and also management estimates regarding possible future outflow on servicing the customers for any corrective action in respect of product failure which is generally expected to be settled within a period of 1 to 2 years from the date of supply.

Onerous contract:

Provision for onerous contract represents the loss assessed by the company on its executory sale contracts. Such loss will be provided as and when the assessment is made, by the company during the course of execution / at the inception of such contracts. The provision is reviewed periodically.

During the year, the Company conducted an assessment of its customer contracts, including a specific contract aimed at gaining exposure to the niche technology in the global defence industry. This contract presents opportunities for the company to become part of global supply chain partner of a leading defence manufacturer. These opportunities are not immediate and are expected to materialize in the future. The company thus classified this contract as an onerous contract in accordance with Ind AS 37 – Provisions, Contingent Liabilities and Contingent Assets, and accordingly the company had recognized a provision of ₹ 14,140.14 Lakh.

Future charges:

Provision for future charges represents the estimated liability on account of revised ancillary/ packing material accepted to be delivered in lieu of ancillary/ packing material originally stipulated in the contract terms for the sales effected earlier and value of spares sent to forward location on user request for serviceability to avoid breakdown in emergency situations.

***Significant judgement:**

Revenue:

- The company recognizes revenue on the basis of percentage of completion method where the customer simultaneously receives the benefit.
- The percentage of completion is determined as proportion of cost incurred for the work performed up to the reporting date to the total estimated cost.
- An expected loss is recognized immediately when it is probable that the total cost will exceed the total revenue.

38(3) Employment Benefit obligations

(i) Post-employment obligations- Gratuity

The company provides for gratuity for employees in India as per the payment of Gratuity Act, 1972. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month computed proportionately for 15 day's salary multiplied for the number of years of service. The gratuity plan is a funded plan and the Company makes contributions to a separate trust. The company does not fully fund the liability and maintains a target level of funding to be maintained over a period of time based on estimations of expected gratuity payments.

Increase : +1%	20,526.16	21,140.48
Decrease: -1%	20,343.60	20,928.50

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as and when calculating the defined benefit liability recognised in the balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

The major categories of plans assets are as follows:

Defined benefit liability and employer contributions

The Gratuity Trust has purchased insurance policy to provide for payment of gratuity to the employees. Every year, the insurance company carries out a funding valuation based on the latest employee data provided by the Company. Any deficit in the assets arising as a result of such valuation is funded by the Company. The company considers that the contribution rate set at the last valuation date is sufficient to eliminate the deficit over the agreed period and that regular contributions, which are based on service costs will not increase significantly.

The expected cash flows over the next years is as follows:

Particulars	Less than a year	Between 2-3 years	Between 4-5 years	Total
31-Mar-25				
Defined benefit obligation - Gratuity	4,889.09	6,873.61	5,403.72	17,166.41

Risk exposure

Through its defined benefit plans, the company is exposed to a number of risks, the most significant of which are detailed below:

Interest Rate Risk: The defined benefit obligation calculated uses a discount rate based on government bonds. If bond yields fall, the defined benefit obligation will tend to increase.

Salary Inflation risk : Higher than expected increases in salary will increase the defined benefit obligation.

Demographic Risk: This is the risk of variability of results due to unsystematic nature of decrements that include mortality, withdrawal, disability and retirement. The effect of these decrements on the defined benefit obligation is not straight forward and depends upon the combination of salary increase discount rate and vesting criteria. It is important not to overstate withdrawals because in the financial analysis the retirement benefit of a short career employee typically costs less per year as compared to a long service employee.

(ii) Provident Fund

Provident Fund Trust of the Company has to declare interest on Provident Fund at a rate not less than that declared by the Employees' Provident Fund Organisation. In case the Trust is not able to meet the interest liability, Company has to make good the shortfall. This is a defined benefit plan and the Company has got the same actuarially valued.

There is no interest shortfall of the provident fund trust for the current year and the previous year.

In view of the uncertainties regarding recoverability of certain instruments made by the PF Trust, during the year 2023-24 an amount of ₹ 415.15 lakhs (₹ 81.63 lakhs during 2023-24) has been reversed due to realisation of higher amounts than the provision made earlier.

Acturial Assumptions	March 31, 2025	March 31, 2024
	(Funded)	(Funded)
Discount rate	6.78%	7.21%
Rate of escalation in salary	6.00%	6.00%

* Yet to be notified

(iii) Compensated absences

The leave obligations cover the company's liability for earned leave. During the year, the company introduced a half-pay leave w.e.f. 1st July, 2024. Accordingly, the company has provided for an additional liability of ₹ 461.59 lakhs related to Half-pay leave for the year 2024-25.

The company maintains a funded plan for the purpose of compensated absences. The company recognises the obligations net of planned assets as per the actuarial valuation. A summary of employee benefit obligation and planned assets is presented below:

38(7) Details of short closed projects:

Out of the advances of ₹ 36234.42 Lakh (as at March 31,2024 ₹ 36234.42 Lakh) received from the customers, in respect of five contracts/ indents and one LOI which are short closed, the Company has made payments to suppliers for procurement of Special Tools and Equipment and Inventory. Against these payments, Special Tools and Equipment (Note 1) include an amount of ₹ 114.05 Lakh (as at March 31,2024 ₹114.05 Lakh), Current Assets (Note 10-16) comprises an amount of ₹ 11041.65 Lakh (as at March 31,2024 ₹ 11041.65Lakh) in Advances to vendors and ₹ 8331.44 Lakh (as at March 31,2024 ₹ 8338.85 Lakh) in Inventories, total amounting to ₹ 19489.55 Lakh (as at March 31,2024 ₹ 19489.55 Lakh). As these assets had been acquired/expenditure had been incurred by the company based on firm orders/ LOI and out of the funds provided by the customer, no loss devolves on the company on account of long outstanding advances and non-moving Special Tools and Inventory. Hence, no provision is considered necessary. Further, in respect of these short closed Indents/contracts/LOI, the company approached the customers for compensation of ₹ 1593.88 lakh (as at March 31,2024 ₹ 1593.88 lakh) being the net amount of expenditure after adjustment of the available advance. Hence, for want of finalisation of the amount from the Government/ Customers, no claim/ impact on profit has been accounted in the books.

Fair Value Hierarchy

The following table presents the fair value hierarchy of assets and liabilities:

(₹ in Lakh)

Particulars	Level	March 31, 2025	March 31, 2024
Financial Assets:			
a) Measured at fair value through profit or loss			
i) Investment in equity instruments in other companies	3	-	-

Financial liabilities:			
a) Measured at fair value through profit or loss			
i) Embedded Derivative financial liability	3	3,476.84	3,527.29

Fair value hierarchy:

Fair value of the financial instruments is classified in various fair value hierarchies based on the following three levels:

Level 1: Quoted prices (unadjusted) in active market for identical assets or liabilities.

Level 2: Inputs other than quoted price including within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

Level 3: Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs). If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case with listed instruments where market is not liquid and for unlisted instruments.

Valuation technique used to determine fair value:

Specific valuation techniques used to value financial instruments include:

- The fair value of unquoted equity instrument are determined with respect to the net worth of the company.
- During the year 2021-22, APGPCL i.e., the company in which BDL had invested in equity, received an adverse arbitration award. The implementation of which is likely to erode the networth of APGPCL. Accordingly Fair value of the investment is considered as 'Nil'.
- The fair value of 45 years deferred credit and receivables is determined using foreign exchange rates as per the contract.

The resulting fair value estimates are included in level 3.

Fair value measurements using significant unobservable inputs (level 3)

The following table presents the changes in level 3 items for the year ended 31 March 2025:

(₹ in Lakh)

Particulars	Unlisted equity shares	Deferred receivable	Embedded derivative liability

Valuation inputs and relationships to fair value

The following table summarises the quantitative information about the significant unobservable inputs used in level 3 fair value measurements.

(₹ in Lakh)

Particulars	Fair value as at		Significant unobservable inputs	Sensitivity
	March 31 2025	March 31, 2024		
Unquoted equity shares	-	-	Fair value of the company	A 1% increase in the fair value of the company would increase the non current investment by Nil with a corresponding impact on profit and loss; a decrease in the fair value of the company would decrease the non current investment by Nil with a corresponding impact on profit and loss.
Deferred receivable	4,814.13	4,933.11	Rupee rate per Special Drawings Right (SDR Unit)	A ₹ 1 increase in the SDR rate would increase the fair value by ₹ 45.83 lakh with a corresponding impact on profit and loss; a ₹ 1 decrease in SDR rate would decrease the fair value by ₹ 45.83 lakh with a corresponding impact on profit and loss.
Embedded derivative liability	3,476.84	3,527.29	Rupee rate per Special Drawings Right (SDR Unit)	A ₹ 1 increase in the SDR rate would increase the fair value by ₹ 47.13 lakh with a corresponding impact on profit and loss; a ₹ 1 decrease in SDR rate would decrease the fair value by ₹ 47.13 lakh with a corresponding impact on profit and loss.

38(16) Financial Risk Management:

The Company's activities expose it to market risk, liquidity risk and credit risk. The analysis of each risk is as follows:

A) Credit risk

Credit risk arises from cash and cash equivalents, instruments carried at amortised cost and deposits with banks, as well as credit exposures to customers including outstanding receivables.

(i) Credit risk management

A. Credit risk on cash and cash equivalents is limited as the Company generally invest in deposits with banks with high credit ratings assigned by external agencies.

B. Credit risk on claims/refunds receivables, trade receivables and unbilled revenues are evaluated as follows:

(i) Year ended March 31, 2025:

(a) Expected credit loss for financial assets where general model is applied

Particulars	Asset group	Estimated gross carrying amount at default	Expected probability of default	Expected credit loss	Carrying amount net of provision

Less: Loss allowance reversed during the year	-	17.14
Loss allowance as at March 31, 2025	(9,098.23)	(4.33)

(iv) Significant estimates and judgements:

Impairment of financial assets:

The impairment provisions for financial assets disclosed above are based on assumptions about risk of default and expected loss rates. The company uses judgment in making these assumptions and selecting the inputs to the impairment calculation, based on the company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

B) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and the availability of funding to meet obligations when due and to close out market positions. Company's treasury maintains flexibility in funding by maintaining availability under deposits in banks.

Management monitors cash and cash equivalents on the basis of expected cash flows.

(i) Financing arrangements

The company has access to the following undrawn borrowing facilities at the end of the reporting period:

C) Market risk

(i) Foreign currency risk

The company operates in a business that exposes it to foreign exchange risk arising from foreign currency transactions, primarily with respect to the USD, Euro, GBP, CHF and SEK. Foreign exchange risk arises from future commercial transactions and recognised liabilities denominated in a currency that is not the company's functional currency (INR). The risk is measured through a forecast of highly probable foreign currency cash flows. The company is eligible for exchange rate variation upon settlement of foreign exchange liabilities for most of the sales contracts. Hence, the company is protected against the foreign currency risk.

38(19) Grant for Solar Plant:

The Company has implemented two Solar Plants of 5 MW each under Jawahar Lal Nehru National Solar Mission (JNNSM) scheme. Viability Gap Fund (VGF) is accounted based on project cost as per the contracts. An amount of ₹ 1545.89 Lakhs is accounted as VGF and disclosed under Deferred Revenue (Note No. 22) in the books of the Company. Deferred Revenue @4% p.a amounting ₹ 61.83 Lakhs is recognized as from Solar Plant.

38(20) Disclosures under Ind AS 115: Revenue from contracts with customers

A Satisfaction of performance obligation

- In majority of the contract performance obligation is satisfied "at a point in time" which is primarily determined on customer obtaining control of the asset. Performance obligation in respect of contract involving supply, Installation and commissioning of complex system is recognised "over a period of time"
- Under "Bill and hold" arrangement performance obligation is satisfied on unconditional appropriation of the goods to the contract on acceptance by the customer.
- Company's Contract normally do not contain significant financial component and any advance payment received and /or amount retained by customer is with intention of protecting either parties to the contract.
- Variable consideration primarily consist of amount receivable/reimbursable against foreign exchange variation clause and liquidated damages. The amount of revenue recognised in respect of the same is determined based on the methodology specified in the contract. The amount is recognised as revenue based on contractual terms.
- The company's turnover mainly includes supply of missiles and allied defence equipments.
- Warranties provided are primarily in the nature of performance warranty.
- The company normally uses the input method to recognise revenue in respect of contracts in which performance obligation are satisfied over a period of time. For arriving at the quantum of revenue to be recognised the percentage of completion method is adopted where in the percentage of actual cost incurred to total estimated cost is applied to the contract price for arriving at the quantum of revenue to be recognised. The company's contract (other than AMC) in respect of which revenue is recognised over a period of time typically involves multiple activities of different nature like construction of building, supply and installation of equipments etc. Due to this it is not possible to quantify in physical terms the quantum of work done (i.e., output) reliably. Whereas, under input method, the cost incurred in respect of these varied activities can be captured and compared to the total estimated cost to be incurred (which can be estimated reliably), for arriving at the percentage of completion. In case of AMC contracts, output method is used to recognise revenue where passage of time is the criteria for satisfaction of performance obligation.

- viii. For revenue recognition in respect of performance obligation satisfied at a “point in time” the following criteria is used for determining whether customer has obtained “Control on asset “
- Terms of delivery as per the contract
 - Customer has legal title to the asset
 - The entity has transferred physical possession of the asset
 - Customer has accepted the asset
 - Entity has the present right to payment for the asset
- ix. Transaction price is typically determined based on contract entered into with customer. Allocation of transaction price in respect to multiple obligations is based on relative standalone selling price which is arrived at based on the latest contract available for similar item sold.
